# Ambience

Elegant and customized design  
for the most discerning individuals.

Suitable for all types of spaces such as shopping centers, airports, restaurants, hotels...

...hospitals, gyms, schools, sports  
stadiums and homes...

# Technology

**The combination of creativity and technology that provides an optimal user experience with 100% hygiene and safety.**

All ffuuss™ products are designed to offer an optimal experience and service to users. We meet the highest standards in technology to make washrooms safer and more comfortable, while taking care of hygiene and health.

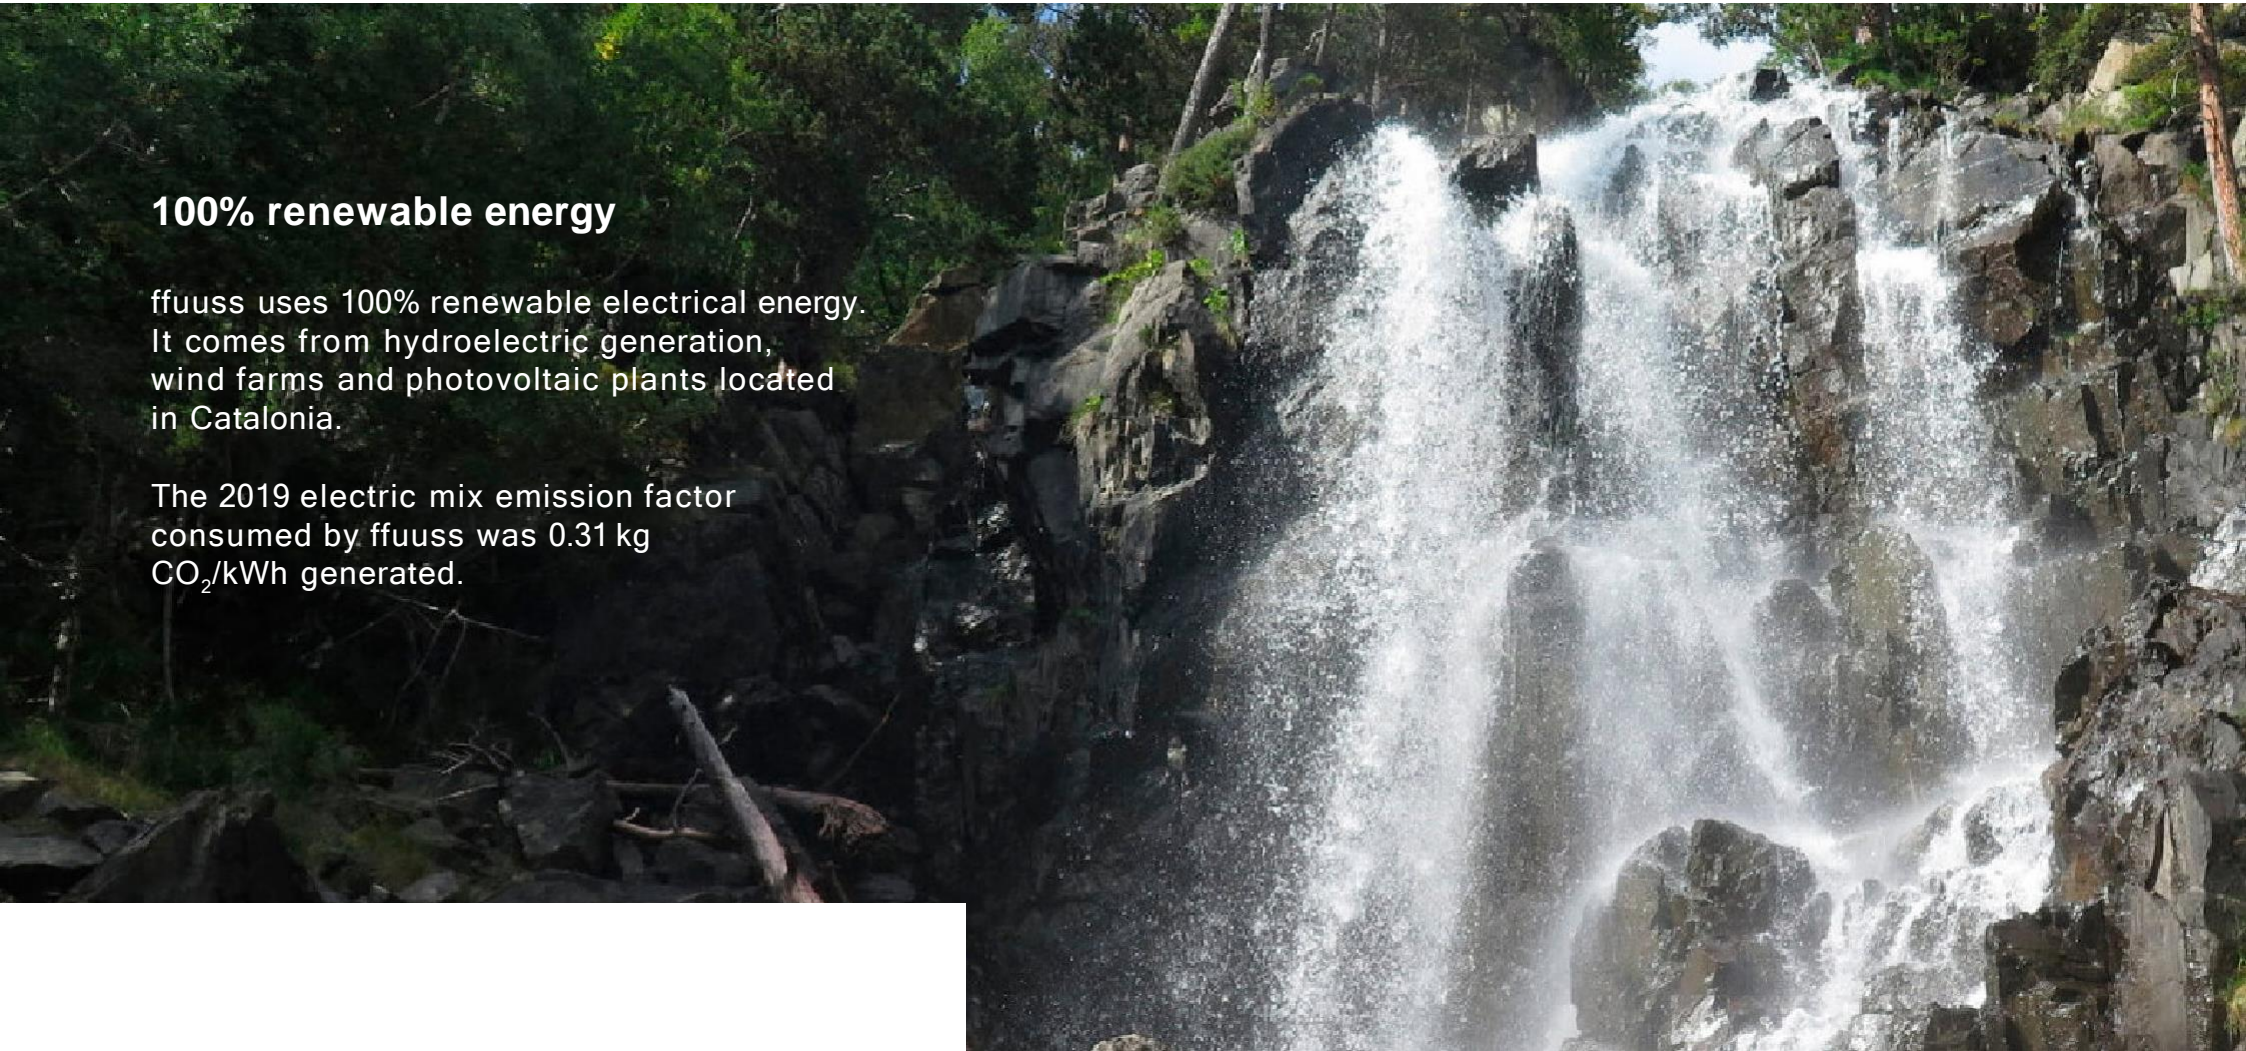

# Sustainability

## 100% renewable energy

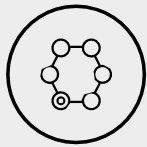

ffuuss uses 100% renewable electrical energy. It comes from hydroelectric generation, wind farms and photovoltaic plants located in Catalonia.

The 2019 electric mix emission factor consumed by ffuuss was 0.31 kg CO<sub>2</sub>/kWh generated.

# Sustainability

## Short series production

We take responsibility over the volume of our production. We produce in short series to avoid unnecessary energy consumption, over production and stocks.

# Features

## Refills

- Hydroalcoholic gel
- Proderm soap
- Secured with a build-in lock
- Anti-drip valve

## How to use

Attach the soap dispenser to the wall using screws or double-sided adhesive tape. Open the ffuuss soap dispenser by inserting the key into the keyhole found on the side and load the machine.

## Hydroalcoholic gel

Supplied in a bag.

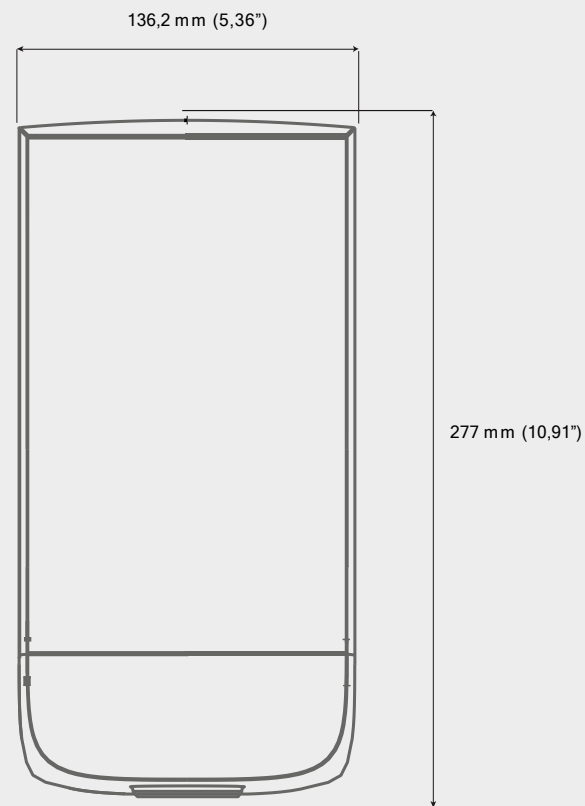

**Bag:** Place the replacement bag on the inner valve (with the outlet tab facing outwards) and squeeze down.

**DC and batteries:** The batteries have a lifetime of 30,000 dispenses of gel.
